Four Professional International Cyclists Forced to Retire Due to "Cardiac Issues." Many Amateur Cyclists Dying Suddenly.

Athletes continue to collapse from sudden cardiac arrests and I believe to see long term cardiac damage caused by COVID-19 mRNA Vaccine.

For example, 34 year old Belgian professional cyclist Sep Vanmarcke announced his retirement because he had a cardiac MRI that confirmed the presence of scarring that he was not aware of. He had only recently started having an abnormally high heart rate that prompted the cardiac MRI.

Most amateur athletes are unable to get a cardiac MRI or cardiac PET to check for scarring that would predispose them to sudden cardiac death. But it could mean the difference between life and sudden death.

From Ethical Skeptic, sudden cardiac death in ages 0 to 54 remains at all time highs:

Oct. 23, 2023 – 28 year old Danish rider Niklas Eg has been forced to retire due to inexplicable instances of irregular heart rate during his training sessions. His medical team has still not determined the cause of the irregular heart rate.
